

Versatility Across Industries

eMobilePOS offers an all-in-one kiosk software that brings all the functionality of a traditional POS system into a kiosk. Providing a stylish design, an ergonomic footprint and intuitive interface, our kiosk solutions are available at significantly lower cost than a traditional POS. Flexible configuration enables merchants to use our kiosk solutions as a standalone system, or seamlessly integrate with their existing POS, accounting software or ERP systems to enable unified commerce.

Dynamic and Flexible Kiosk Solutions

Customized to Meet Diverse Business Needs

Retail

Food & Beverage

Tours & Events

How does it work in the real world?

*We worked with an iconic business that implemented two eMobilePOS Kiosks and achieved impressive sales results. They sold over **\$1 million** through these kiosks in just **six months!** This showcases the revenue potential and effectiveness of self-service kiosks in real-world scenarios.*

SCAN TO LEARN MORE

The eMobilePOS Kiosk comes in countertop, wall-mounted or floor stand versions, offering a user-friendly, interactive self-service solution. It enables customers to easily place orders, choose add-ons and modifiers, earn and redeem rewards, and complete payments in just a few straightforward steps.

A Versatile Kiosk Solution Applicable to Different Uses.

- ✓ Applicable to both food and beverage operations, as well as retail and ticket sales.
- ✓ Boost sales potential without increasing labor costs.
- ✓ Offer self-service in addition to having a cashier on-site.
- ✓ Establish self-service micro markets operating 24/7 in office buildings, hotels, and gyms.
- ✓ Great for ordering at the counter, dining in, or getting takeout from fast-food outlets.
- ✓ Sell Tickets for events and tours enhancing customer engagement and improving ROI by increasing venue traffic, reducing overhead, and expediting service.

Age Verification Feature

Scan Items for easy checkout

OPTIONAL SELF-CHECKOUT RFID MODULAR SYSTEM

Works with both eMobilePOS
and eMobilePOS Kiosk

Product Overview

Few things frustrate customers more than waiting at cash registers, which is why self-service checkouts are increasingly popular.

Enhancing the customer experience and optimizing business processes in retail stores and other spaces can be achieved with RFID technology.

The RFID Well is a modular RFID-based solution that quickly and reliably identifies all the products a customer wants to buy. This accelerates the payment process and reduces queues, improving the shopping experience and boosting sales.

Key Benefits

Queues reduction

Speeds up checkout, reducing wait times.

Employee Cost Savings

Lowers labor costs through automation.

Better Shopping Experience

Provides a seamless and satisfying shopping experience.

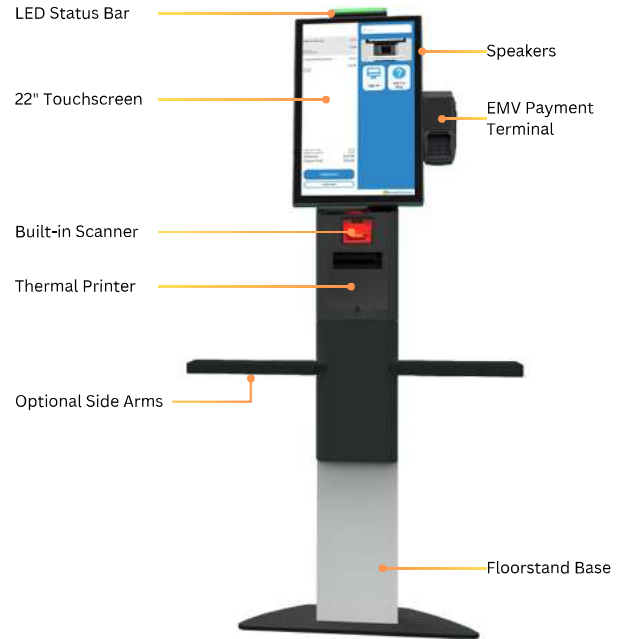

Loss Prevention

Enhances security and reduces theft.

Integrating kiosks with eMobilePOS through our eaSSy system transforms your business operations. This integration offers a dual advantage – it acts as an independent system while syncs directly to your existing eMobilePOS setup. Our Kiosk Edition is engineered for intuitive customer engagement, significantly elevating user experiences across various environments.

The key to its functionality is its seamless compatibility with established POS systems and essential business platforms, including QuickBooks, SAGE, RetailPRO and Retail Management Hero just to name a few. This integration facilitates a unified operation, enabling businesses to manage transactions and customer interactions more efficiently.

Available in three form factors: Countertop, Wall-Mounted and Floor Stand.

In retail settings, the use of RFID tags in conjunction with the RFID Well allows for express checkout, enhancing the shopping experience with increased efficiency.

About e-Nabler Corporation

Founded in 2000, e-Nabler Corporation stands at the forefront of mobile POS software innovation. Pioneering the sector with eMobilePOS, our acclaimed software was the first full-featured mobile POS application on iTunes and is now available on both the Apple Store and Google Play. Our cutting-edge eaSSy technology enhances existing POS systems by facilitating seamless integration with legacy POS software, ERP & accounting systems, e-commerce platforms, and payment platforms. At e-Nabler, our vision is to revolutionize POS functionality, achieving excellence one integration at a time. We are dedicated to empowering businesses with solutions that speak directly to their needs, driving their success in an ever-evolving digital landscape.
