PRODUCTS

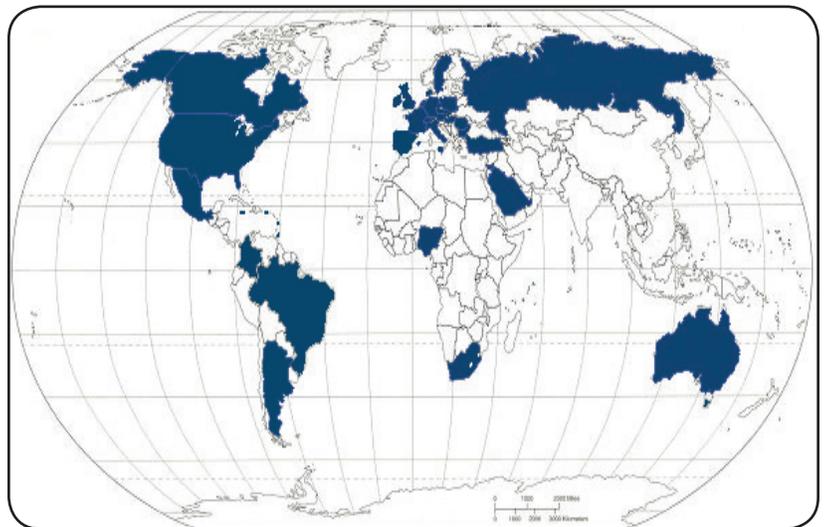

NCC products drive many of the businesses across North America and around the world. NCC partners with the most respected companies in the industry to deliver proven, reliable and cost effective solutions.

- Point of Sale
- Back Office
- Headquarters

NCC has been delivering comprehensive management solutions to businesses in the retail and hospitality industries since 1986. Our software engineers combine years of experience in software development with a strong understanding of restaurant and retail operations to create products designed to work in a wide variety of environments.

For nearly a decade, Toshiba TEC Corporation and its subsidiaries distributed hospitality solutions developed by NCC. NCC products are installed in wide range of concepts including Table Service, Quick Service, Fast Casual, Bars, Night Clubs, Coffee Shops, Cafes, Thrift Stores, Liquor Stores, Small Grocery and General Retail.

POWERING BUSINESS

AROUND THE WORLD

TABLE SERVICE RESTAURANTS

NCC's table service solution includes graphical table and guest management, table-side ordering and payment processing, split and combine check features, inventory control and labor scheduling/management.

QUICK SERVICE RESTAURANTS

NCC has the management tools necessary to run quick service operations. From counter service to drive thru, from delivery to web ordering, Reflection POS gives operators the tools to operate a efficient and profitable business.

RETAIL STORES

NCC delivers a complete set of management solutions to small and medium-sized retail operations. Retailers can manage staff, track sales and inventory, manage vendor orders and control operating costs.

PRODUCTS

POINT OF SALE

At the core of the product line is Reflection POS®. Reflection POS® delivers high-end point of sale features with the reliability and security of an ECR. Reflection POS® is available as an Embedded POS system or as an "open" Windows® POS system.

BACK OFFICE

PC Workstation, an optional component of a Reflection POS® system, delivers real-time reporting and management functions to a familiar Windows® computer. For retail operations, Retail backOffice is used to manage products, inventory and vendor orders.

HEADQUARTERS

Reflection POS® HQ provides web-based reporting and management tools to independent operators and local, regional and national chains. Store data is automatically pushed to RHQ and report information is available within minutes after the POS system is closed.
